NTware

Do your thing at NT-ware Enterprise Solutions GmbH in Stuttgart.
We're the makers of uniFLOW sysHUB, a corporate solution for integrating, automating, and monitoring business processes and applications. Since August 2019 we've been a subsidiary of NT-ware System-programmierungs-GmbH, an innovation partner and member of the Canon Group in Bad Iburg, Germany, that develops state-of-the-art software for print and scan management from scratch and in ongoing dialogue with our colleagues in New York, Singapore and Tokyo. With our highly flexible working environment and our pioneering approaches regarding time, space, and equipment, we are a fount of ideas for newer and better solutions.

FULL STACK WEB DEVELOPER (M/F/D)
This sounds amazing!

Are you a professional when it comes to Java, Web API and maybe even frameworks like Spring and Hibernate? Are you familiar with JavaScript and established JS frameworks (OpenUI5, Angular, React)? And have you already created and used RESTful web services? Sounds great! Of course, you're also experienced when it comes to object-oriented programming, conducting unit and integration tests, and finding independent solutions to tricky problems. UX and visual design also in your skill set?

Are you at the beginning of your professional career? We are always on the look-out for new talent and would love to receive your on-spec application!

Of course!

Experience? Is something I'd like to gain with NT-ware.

At NT-ware, you'll meet a friendly technical and support team made up of delightfully easy-going people from over 35 nations. At each of our locations, we put our heads together to develop, test, and implement exciting ideas. This position also requires English in addition to excellent German. What is your English like?

I love it!

My English could be better.

With us, you can go all out:
– You're part of an interdisciplinary team that develops and designs the central online platform for our products.
– In your role, you will be encouraged to drive innovations every single day by contributing new, exciting ideas for creative problem-solving.
– At the same time, you proactively identify opportunities for improving the design, user interface, and architecture of the central online platform for our products.

Then we'll need to work on that because English is just as important in this job as German. With our certified in-house language courses, you will soon be speaking fluently.

That sounds perfect. Is there any information about the perks and benefits?

I don't think this is the right job for me :(

That's too bad. Good luck with your job search!

Perks and benefits? Of course. We offer a super-flexible, highly modern, and well-equipped workspace with a company bonus plan, opportunities for continued professional development, driver safety training, work bicycle rentals, partnerships with gyms, work from home, electric height-adjustable desks if desired, and much more... Convinced?
